New lease of life for kitchens

MOST fitted kitchens, even if looking tired, have a good basic construction. However, the doors, drawer fronts and sometimes the worktops can make a kitchen look old and outdated.

In 1986, Re-Nu pioneered the idea of renovating kitchens by making and fitting completely new doors, drawer fronts and worktops.

As the most experienced in this method in the industry, Re-Nu has enabled countless customers to enjoy a modern stylish kitchen without the expense and upheaval of having existing units ripped out and completely replaced.

It's as simple as this. Re-Nu surveys your existing kitchen and helps you select new doors, worktops etc from its extensive

range and gives you a fixed price quotation with no hidden extras.

Re-Nu's own fitters, rather than sub-contractors, carry out the installation, and you will be pleasantly surprised at how quickly the work is carried out - and how little mess and disruption it causes. Most of its refurbishments take just a day or two to complete.

Choosing Re-Nu makes a great deal of sense. You save money; it's quick and efficient and your refurbished kitchen looks like a new one - as you can see from these before and after photos.

For more information and a survey of your kitchen, call Re-Nu on 0800 195 8641, or see the www.re-nukitchens.co.uk.

Milford Window Company is a window, door and conservatory installer, specialising in PVCu and aluminium.

Superior quality at the Milford Window Company

THE Milford Window Company is your local window, door and conservatory installer, specialising in PVCu and aluminium. It is a family run business that has established itself as a reputable company over the years - the majority of its work generating from recommendations and referrals, which the company prides itself on.

Its success is due to offering excellent quality products together with a high level of friendly, no pressure-sales customer service that is second to none. The company decided not to follow the trend and go down the bargain basement product line and instead offers superior quality hardware such as a choice of stylish handles including gun metal and polished chrome, hinges, door and window gearing, locks etc. at sensible prices.

Over the last year it has introduced some fabulous new products which are proving to be very successful, which include bi-fold doors. These are an exciting alternative to patio doors. They add versatility and style to your home, making socialising and entertaining more pleasurable. With no barrier between your home and your garden - you won't know where one starts and the other stops. And with a

great choice of colours and finishes, your home will be instantly unique!

Its coloured doors are still very popular. These products are not the run of the mill composite doors. With many choices of colour, glass styles and handle choices available, customers are able to design their own doors. They are the nearest you can get to looking like a traditional wooden door with the added advantage of them being maintenance free and far more secure using hook bolts, cams and deadlocks in seven places. The colours are sharp, unlike the dull colours which is often the result with the composite door.

Another product there has been a demand for is Celsius glass. This glass enables you to use your conservatory all year round. It keeps the sun's energy out in summer and keeps the interior warm in winter. It also stays cleaner for longer than conventional glass with a transparent coating bonded into the external surface of the glass which uses the power of ultra-violet rays and the rain to break down dirt and grime and wash it clean away. So whether it's for your roof

only or to include the side frames too, you can enjoy the comfort of your conservatory all year round!

With the rising cost of moving house, it makes sense to create extra space where you are. Milford Window Company can design a bespoke conservatory to solve your problems.

All its work is covered by insurance backed guarantees and it is a registered member of FENSA and the UK Trades Confederation. Its workmen are the company's employees and it does not use sub-contractors. For further information please call 01483 426141.
