MOT'S, SERVICING AND REPAIRS

Hassle-free A & T

A & T AUTOMOTIVE garage is Woking's independent VW and Audi specialist.

Your first port of call for repairs and sales should be A & T. It is a reliable and honest company with car crazy mechanics who are dedicated to you and your vehicle.

They are specialists in brakes and clutch repairs but are also able to carry out repairs to your vehicle without affecting your manufacturer's warranty.

A & T is based in Monument Way West in Woking. It is in an easy to reach location with plenty of parking and space, which makes it a hassle-free visit.

A full collection and delivery service for your convenience can be arranged. Once they

A & T Automotive is a specialist in brakes and clutch repairs.

have worked their magic, A & T will aim to get your pride and joy back to you as soon as possible, so you can be back on the road in no time at all. A & T has

more than 50 years experience and the aim is to give the highest level of customer and motor service and at an affordable price, to assist you

in maintaining your vehicle in the long-term.

After your vehicle's third birthday, it is essential for your own safety and legal purposes to ensure it is fully checked every 12 months.

It is a UK requirement that all 'on-the-road' vehicles hold a MOT certificate. A & T offers a full service and test at its MOT centre.

You can either give A & T a call or simply visit the website, fill in the short 'book a service' or the even shorter 'book an MOT' and then click the send button. Our team will confirm your booking by your preferred method of contact.

For more details, or to book a service, call Andy or Graham on 01483 771818 or log on to www.at-automotive.com.

The top team at Harding Auto Service work with the most up-to-date diagnostic equipment available.

Go for a winning double over at DC Auto

DC AUTO Engineers is a small family business run by Dave Emms and his partner Carol.

Dave and Carol took over the workshop of a Proton/Perodua main dealer garage in July 2006 and still specialise in Proton, Perodua and Fords but are not main dealers.

Mr Emms said: "This has meant we can keep our prices lower and offer servicing, MOTs and repairs to all makes and models of cars and vans."

"We also offer a collection and delivery service from your home or workplace or we can drop you in town

while your car is being repaired."

Why pay main dealer prices? Block exemption legislation has been in force since October 2003.

This gives motorists the right to take their car where they want to have it serviced and repaired without invalidating the manufacturer's warranty, so long as its service schedule is followed and OE quality parts are used.

Mr Emms added: "This could save you pounds. Our servicing prices start at £99 plus VAT."

"What a lot of people don't realise is that having your car serviced annually makes it more economical to run."

"We have a great offer on air-conditioning re-gas at £49.99 including VAT. Your air-con system works like a fridge and if not maintained regularly, you get bacteria and mould."

"These can lead to eye and throat infections."

DC Auto is at Unit 2, Boundary Business Centre, Boundary Road, Woking. Tel 01483 776124.

DC Auto is based in Woking and is run by Dave Emms and partner Carol who offer servicing and repair work at very competitive prices for all makes and models of cars and vans.

Head for Harding

HARDING Auto Services have been a local family-run business since 1979.

It maintains its independence but also has the backing of being a Bosch service centre. It also has an MOT testing station.

Harding's has invested heavily in the most up-to-date diagnostic equipment available and with a highly-skilled staff can service and maintain your car to main dealer standard at independent garage prices.

Manufacturer service schedules are followed and OE quality parts used so your car can be serviced at Harding's

without invalidating the manufacturer's warranty, even on your new car.

You can benefit from low prices and everything is fully guaranteed. Free courtesy cars are also available.

Leading the team is Michael Harding, who has a masters degree in mechanical engineering and is an expert at fault code and live data analysis.

With the soaring cost of fuel it is becoming more and more viable to have your car's ECU remapped. This will greatly improve fuel economy and increase performance.

For diesel cars only, a diesel

power unit can also be fitted. This is transferable and so could be fitted to your next car.

The cost is recoverable in about 15,000 miles. Call Michael if you need further details.

Mechanical repairs, such as brakes, exhausts, clutches, cambelt replacements and tyre fitting, are all carried out in the fully-equipped workshops.

Harding Auto Services is also an air-conditioning specialist, carrying out servicing, repairs, regassing and anti-bacterial treatments to your car's air-conditioning system.

It is recommended you have an aircon service every three

years. This is to prevent a build-up of bacteria.

Malcolm Harding, trained by Rolls Royce, founded Harding Auto Services in 1979 and is still working hard there.

He specialises in servicing and maintaining vintage and classic vehicles.

He regularly gets asked to prepare them for rallies all over the world and it is common to see Rolls Royces, Lagondas, Rileys, MGs and E-type Jaguars all receiving expert attention from Malcolm.

Call Harding's on 01483 487626 if you need further details or visit the website at www.hardingautos.co.uk.

AES is that bit special

AUTO Electrical Services (AES) is a family-run company which was founded 27 years ago.

In 2000 it moved to its current premises at 122 Goldsworth Road, Woking, on the left-hand side of Surrey History Centre.

Most people don't realise it is a specialist operation and take their vehicles in to a normal servicing garage if they have an electrical fault, rather than going to AES which is able to diagnose and fix the fault in a shorter period of time.

When was the last time you checked your lights? AES has noticed lots of vehicles around with faulty lights.

This is not only dangerous but can also get you stopped by the police. It may be just a faulty bulb or could be more serious, AES is more than well equipped to find the fault and get you back on the road quickly.

AES is the only auto-electricians in Woking and always happy to help.

If you have any lighting, electric windows, alternator, general electrical or charging problems, or maybe you have tried changing the fuse or bad earths, then give us a call on 01483 771021.

Arthur Dobbie's AES is based in Woking.

Let Joe's have a go at finding your ideal car

WHETHER you are looking for a first car, second or third, we are sure you will enjoy dealing with Joe's Garage.

Joe's, based in Bagshot Road, Chobham, has more than 25 years experience. Within the ever-changing and challenging car market, the experience is there to satisfy and exceed your expectations and also the know-how to service and maintain your car.

Sourcing your next car can be time-consuming, confusing and costly, especially if you don't know what to look out for.

At Joe's all our cars are checked and verified for your complete peace of

mind. They carry a standard three month warranty covering major parts and labour which can, of course, be extended.

Joe's would like to invite you to call, email or visit the showroom and put us to the test. We hope you like the selection of cars and would like to point out that if you don't see what you are looking for, tell us and we will find it for you at no extra cost.

So why put off until tomorrow what you can do today? Call us now and let us provide you with the car you've been searching for. Then tell everyone you did it the Joe's Garage way! Call 01276 857 721.

Joe's Garage offers a wide range of top-quality vehicles.
